

Refresher Program for Generic Induction to Coal Mining Core and Underground Elective (formerly known as Surface & Underground Combined)

The purpose of this generic induction training program is to refresh the coal mine workers' knowledge of, and demonstrate current competence in, the Acts and Regulations, accepted practices, and safety procedures that are employed in surface and underground coal mining sites in Queensland.

Topics covered in this program are:

Core

- The Coal Industry
- Your Obligations Under the Law
- General Safety
- Managing Work Hazards
- Isolation, Tagging, Permits & Defect Reports
- Traffic & Mobile Equipment Procedures
- Emergency Procedures
- Life Saving First Aid
- Fire Fighting & Prevention
- The Environment
- The Work Process Model

Underground Elective

- Underground Mining Techniques
- Your Obligations Under the Law
- General Underground Safety
- Managing Underground Work Hazards
- Spontaneous Combustion
- Introduction to Strata Support
- Emergency Underground Procedures

Participants who successfully complete this training program will receive a Statement of Attainment for two units of competency in partial completion of MNC20107 Certificate II in Surface Coal Operations. Participants will also receive a Certificate of Completion and a Generic Induction Passport.

Competency Unit:

MNCC1006B Conduct Local Risk Assessment
MNCG1013A Apply Initial Response First Aid

The Mining Industry Skills Centre issues a Generic Induction Passport which will be valid for 2 years.
